SUMMARY

Amphenol Corp. (Amphenol), U.S. producer of electronic and fiber optic connectors, cable and interconnect systems and supplier to companies such as Cisco and Nokia, ranks joint 37th out of 45 companies. Since 2022, the company improved on the theme of Commitment & Governance, adopting version 8 of the RBA Code of Conduct, which removes limitations on the right to freedom of association and collective bargaining. However, the company did not improve across other themes. The company performed particularly poorly on the themes of Purchasing Practices, Enabling Workers' Rights, Monitoring, and Remedy, scoring zero. As such, the company's rank has dropped by two places.

KnowTheChain identified one allegation of forced labour in the company's supply chains, related to Uyghur forced labour. However, the company does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. Steps the company could take to address forced labour risks in its supply chains, include disclosing policies and practices on themes such as Enabling Workers' Rights, Monitoring, and Remedy.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Enabling Workers' Rights: To prevent and address forced labour risks in its supply chains, the company may consider ensuring that a formal and effective mechanism to report grievances regarding labour conditions is available and communicated to its suppliers' workers and relevant stakeholders, such as worker organisations or labour NGOs. Further, the company is encouraged to take steps to ensure that workers in its supply chains are able to exercise their rights to freedom of association and collective bargaining.

Monitoring: The company may consider adopting and disclosing a supplier monitoring process to verify that its suppliers are compliant with its supply chain policies. Implementing specific practices, such as interviewing workers and in particular using worker-driven monitoring (i.e. monitoring undertaken by independent organisations that includes worker participation and is guided by workers' rights and priorities), may help the company detect forced labour risks in its supply chains. Disclosing information on the results of its monitoring efforts, such as the percentage of suppliers assessed annually and a summary of findings, assures stakeholders that the company has strong monitoring processes in place.

Remedy: The company may consider establishing a process to ensure that remedy is provided to workers in its supply chains in cases of forced labour and disclosing details on this process, such as responsible parties, approval procedures, timeframes, and, crucially, engagement with affected stakeholders. To demonstrate to its stakeholders that it has an effective remedy process in place, the company is encouraged to disclose examples of remedy provided to its suppliers' workers, including with respect to specific allegations in its supply chain.

¹ The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.

² Research conducted through September 2024 or through December 2024, where companies provided additional disclosure or links. For more information, see the full dataset [here](#).
