SUMMARY

Dell Technologies Inc. (Dell), the world's third-largest personal computer vendor,⁴ ranks 11th out of 45 companies. Compared to 2022, the company improved its rank by 5 places. This is because the company adopted version 8 of the RBA Code of Conduct, which removes limitations on the right to freedom of association and collective bargaining, provided stronger detail on the forced labour training it provides to suppliers, and began disclosing the findings from its supplier monitoring process. The company scores higher than average on the themes of Commitment & Governance, Traceability & Risk Assessment, Monitoring, and Remedy. Notably, Dell is one of only four companies publicly disclosing a full or near-full list of its first-tier suppliers. KnowTheChain identified two allegations of forced labour in the company's supply chains. The company did not disclose the steps taken to address the allegation nor remedy outcomes for workers. Further, the company does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. The company has an opportunity to further improve its performance and disclosure on the themes of Purchasing Practices, Enabling Workers' Rights, and Remedy.

LEADING PRACTICES

Traceability and Supply Chain Transparency: Dell discloses a list of first-tier suppliers which it states covers at least 95% of FY23 spend. The list includes names, addresses, and supplier types.

OPPORTUNITIES FOR IMPROVEMENT

Purchasing Practices: To address forced labour risks in its supply chains, the company is encouraged to adopt purchasing practices that decrease the risk of forced labour, such as improving planning and forecasting and prompt payment, and disclose quantitative data evidencing the implementation of responsible purchasing practices. The company is further encouraged to take steps to ensure that pricing includes the full cost of production, including a living wage/income, and may consider ring-fencing labour costs such that they are not impacted during pricing negotiations. The company should consider integrating [responsible buying practices in its contracts](#) with suppliers, to ensure that the responsibility for respecting human rights is shared.

Enabling Workers' Rights: To support collective worker empowerment, the company is encouraged to work with local or global trade unions to support freedom of association in its supply chains. Further, the company is encouraged to disclose examples, covering different supply chain contexts, of how it improved freedom of association and/or collective bargaining for its suppliers' workers. The company is also encouraged to disclose the percentage of suppliers' workers covered by collective bargaining agreements. To guarantee protections for supply chain workers on freedom of association and collective bargaining, the company may consider entering into a global framework agreement or enforceable supply chain labour rights agreements with trade unions or worker organisations.

Remedy: The company may consider establishing and disclosing a process to ensure that remedy is provided to workers in its supply chains in cases of supply chain labour rights violations and disclosing details on this process, such as responsible parties, approval procedures, timeframes, and, crucially, engagement with affected stakeholders. While the

company demonstrates remedy in the case of some violations, to demonstrate to its stakeholders that it has an effective remedy process in place, the company is encouraged to disclose further examples of remedy provided to its suppliers' workers, including with respect to specific allegations in its supply chains.

¹ The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.

² Research conducted through September 2024 or through December 2024, where companies provided additional disclosure or links. For more information, see the full dataset [here](#). For information on a company's positive and negative human rights impact, see the Business & Human Rights Resource Centre [website](#).
