SUMMARY

Keyence Corp. (Keyence), an electronics equipment manufacturer, ranks 40th out of 45 companies. Since 2022, the company improved on the themes of Commitment & Governance and Recruitment, disclosing training on its code of conduct for staff, including those responsible for procurement, and updating its supplier code of conduct to require that worker who have paid recruitment fees be reimbursed. However, the company did not improve across other themes. As such, the company's score has dropped by 2 points. The company scores below the industry average across all themes. The company is encouraged to improve its performance and disclosure on the themes of Traceability & Risk Assessment, Enabling Workers' Rights, and Remedy.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Traceability & Risk Assessment: While the company indicates that it identifies significant human rights risks based on regional risk, the company is encouraged to disclose the different sources used and stakeholders engaged to assess human rights risks and to disclose forced labour risks across different tiers of its supply chains. It is further encouraged to disclose how it engages with relevant stakeholders including workers, unions, and civil society organisations to address forced labour risks identified.

Enabling Workers' Rights: The company discloses a section of its website that can be used by "business partners (suppliers)" to report inquiries related to sustainability and human rights. The company is encouraged to take steps to ensure that a formal mechanism to report grievances regarding labour conditions in the company's supply chains is available and communicated to its suppliers' workers in particular, as well as to relevant stakeholders (e.g. worker organisations or labour NGOs). Further, the company may consider disclosing data about the practical operation of the mechanism, such as the number of grievances filed, addressed, and resolved.

Monitoring: The company is encouraged to adopt and disclose a supplier monitoring process to verify that its suppliers are compliant with its supply chain policies. Implementing specific practices, such as interviewing workers and in particular using worker-driven monitoring (i.e. monitoring undertaken by independent organisations that includes worker participation and is guided by workers' rights and priorities), may help the company detect forced labour risks in its supply chains. Disclosing information on the results of its monitoring efforts, such as the percentage of suppliers assessed annually and a breakdown of findings, assures stakeholders that the company has strong monitoring processes in place.

¹ The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.

² Research conducted through September 2024 or through December 2024, where companies provided additional disclosure or links. For more information, see the full dataset [here](#). For information on a company's positive and negative human rights impact, see the Business & Human Rights Resource Centre [website](#).
