## SUMMARY

Micron Technology Inc. (Micron), a supplier to companies including Cisco, Dell and Samsung, ranks 24<sup>th</sup> out of 45 companies. Since 2022, the company adopted version 8 of the RBA code of conduct, which removes limitations on the right to freedom of association and collective bargaining. However, the company did not improve across other themes and scores zero on four of seven themes. As such, the company's score has dropped by four points. KnowTheChain identified one allegation of forced labour in the company's supply chains, related to alleged Uyghur forced labour. However, the company does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. The company is encouraged to improve its performance and disclosure on the themes of Enabling Workers' Rights, Monitoring, and Remedy.

---

## LEADING PRACTICES

None.

---

## OPPORTUNITIES FOR IMPROVEMENT

**Enabling Workers' Rights:** While the company discloses a third-party operated reporting mechanism, this appears to be available only to its own employees. To prevent and address forced labour risks in its supply chains, the company may consider ensuring that a formal and effective mechanism to report grievances regarding labour conditions is available and communicated to its suppliers' workers and relevant stakeholders, such as worker organisations or labour NGOs. Further, the company is encouraged to take steps to ensure that workers in its supply chains are able to exercise their rights to freedom of association and collective bargaining, including by working with local or global trade unions to support freedom of association in its supply chains.

**Monitoring:** While the company discloses that manufacturing suppliers undergo RBA Validated Assessment Program audits, the company is encouraged to disclose the percentage of suppliers assessed annually and a breakdown of findings, to assure stakeholders that the company has strong monitoring processes in place. Implementing specific practices, such as interviewing workers and in particular using worker-driven monitoring (i.e. monitoring undertaken by independent organisations that includes worker participation and is guided by workers' rights and priorities), may help the company detect forced labour risks in its supply chains.

**Remedy:** The company may consider establishing a process to ensure that remedy is provided to workers in its supply chains in cases of forced labour and disclosing details on this process, such as responsible parties, approval procedures, timeframes, and, crucially, engagement with affected stakeholders. To demonstrate to its stakeholders that it has an effective remedy process in place, the company is encouraged to disclose examples of remedy provided to its suppliers' workers, including with respect to specific allegations in its supply chains.

---

<sup>1</sup> The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.
