SUMMARY

NVIDIA Corp. (NVIDIA), a supplier to companies such as Amazon and Cisco, and one of the top three largest technology companies by market capitalisation globally,⁴ ranks joint 31st out of 45 companies. Compared to 2022, the company does not seem to have taken steps to strengthen its performance and disclosure on forced labour issues within its supply chain. As such, its score has dropped by five points. The company's score is based on its performance on the themes of Commitment & Governance and Traceability & Risk Assessment, as well as demonstrating above average performance on the theme of Remedy. The company scored zero on the themes of Purchasing Practices and Enabling Workers' Rights. KnowTheChain identified one allegation of forced labour in the company's supply chains, related to alleged Uyghur forced labour. However, the company does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. The company is encouraged to improve its performance and disclosure on themes including Purchasing Practices, Recruitment and Enabling Workers' Rights.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Purchasing Practices: To address forced labour risks in its supply chains, the company is encouraged to adopt purchasing practices that decrease the risk of forced labour, such as improving planning and forecasting and prompt payment, and disclose quantitative data evidencing the implementation of responsible purchasing practices. The company is further encouraged to take steps to ensure that pricing includes the full cost of production, including a living wage/income, and may consider ring-fencing labour costs such that they are not impacted during pricing negotiations. The company should consider integrating [responsible buying practices in its contracts](#) with suppliers, to ensure that the responsibility for respecting human rights is shared.

Recruitment: While the company has a policy that prohibits worker-paid recruitment fees, the company may further consider disclosing how it prevents fees being charged in the first instance, such as through mapping of migration corridors and labour agencies used by suppliers, specialised monitoring for fees, and/or evidence of supplier payment of fees to labour agencies directly. It may also consider disclosing steps taken to ensure that such fees are reimbursed to the workers. The company is also encouraged to provide details of how it supports responsible recruitment in its supply chains.

Enabling Workers' Rights: While the company has established a formal, third-party grievance mechanism for employees, suppliers and other "external stakeholders", it is unclear whether, in practice, suppliers' workers have access to the mechanism to raise grievances about labour conditions. The company is, as such, encouraged to ensure that a formal and effective mechanism to report grievances regarding labour conditions is available and communicated to its suppliers' workers and relevant stakeholders, such as worker organisations or labour NGOs. Further, the company is encouraged to take steps to ensure that workers in its supply chains are able to exercise their rights to freedom of association and collective bargaining.

¹ The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.

² Research conducted through September 2024 or through December 2024, where companies provided additional disclosure or links. For more information, see the full dataset [here](#). For information on a company's positive and negative human rights impact, see the Business & Human Rights Resource Centre [website](#).
