SUMMARY

Panasonic Corp. (Panasonic), a consumer electronics company, ranks joint 34th out of 45 companies. Compared to 2022, the company improved its score by one point. This is because the company disclosed a strengthened policy on the charging of recruitment fees, requiring fees to be repaid to workers where they had been charged, as well as a framework agreement with the International Organisation for Migration. However, the company did not improve across other themes. Panasonic performed particularly poorly on the themes of Traceability & Risk Assessment, Purchasing Practices, Monitoring, and Remedy, scoring zero. The company scores at the benchmark's average on the theme of Recruitment and lower than average on other themes.

KnowTheChain identified two allegations of forced labour in the company's supply chains. With respect to an allegation concerning Uyghur forced labour, the company stated it did not have a direct contractual link to the facility. However, it does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. With respect to the second allegation, the company discloses information on some steps taken to investigate and address the allegation including verifying "partial correction"; however, it does not disclose engagement with affected stakeholders, nor remedy outcomes for workers.

Additional steps the company could take to address forced labour risks in its supply chains include disclosing policies and practices on the themes of Traceability & Risk Assessment, Monitoring, and Remedy.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Traceability & Risk Assessment: To demonstrate a strong understanding of its supply chains, the company may consider disclosing the names and addresses of its first-tier suppliers, the countries in which its below-first-tier suppliers operate, the countries from which it sources raw materials at high risk of forced labour, and data on the demographics of the supply chain workforce (such as the percentage of women and migrant workers). The company is further encouraged to assess forced labour risks across its supply chains and disclose the risks identified.

Monitoring: The company may consider adopting and disclosing a supplier monitoring process to verify that its suppliers are compliant with its supply chain policies. Implementing specific practices, such as interviewing workers and in particular using worker-driven monitoring (i.e. monitoring undertaken by independent organisations that includes worker participation and is guided by workers' rights and priorities), may help the company detect forced labour risks in its supply chains. Disclosing information on the results of its monitoring efforts, such as the percentage of suppliers assessed annually and a summary of findings, assures stakeholders that the company has strong monitoring processes in place.

Remedy: The company may consider establishing a process to ensure that remedy is provided to workers in its supply chains in cases of forced labour and disclosing details on this process, such as responsible parties, approval procedures, timeframes, and, crucially, engagement with

affected stakeholders. To demonstrate to its stakeholders that it has an effective remedy process in place, the company is encouraged to disclose examples of remedy provided to its suppliers' workers, including with respect to specific allegations in its supply chains.

¹ The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.

² Research conducted through September 2024 or through December 2024, where companies provided additional disclosure or links. For more information, see the full dataset [here](#). For information on a company's positive and negative human rights impact, see the Business & Human Rights Resource Centre [website](#).
