SUMMARY

STMicroelectronics NV (STMicroelectronics), a semiconductor manufacturing company which supplies to companies including Cisco, NVIDIA, and Samsung, ranks joint 19th out of 45 companies. Since 2022, the company adopted version 8 of the RBA code of conduct, which removes limitations on the right to freedom of association and collective bargaining. However, the company did not improve across other themes. The company performed particularly poorly on the themes of Purchasing Practices and Enabling Workers' Rights. As such, the company's rank has dropped by 4 places. It scores higher than average on the themes of Commitment & Governance, Monitoring, and Remedy and below average on all remaining themes. KnowTheChain identified one allegation of forced labour in the company's supply chains, related to alleged Uyghur forced labour. However, the company does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. The company is encouraged to improve its performance and disclosure on the themes of Traceability & Risk Assessment, Purchasing Practices, and Enabling Workers' Rights.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Traceability & Risk Assessment: To demonstrate a strong understanding of its supply chains, the company may consider disclosing the names and addresses of its first-tier suppliers, the countries in which its below-first-tier suppliers operate, the countries from which it sources raw materials at high risk of forced labour, and data on the demographics of the supply chain workforce (such as the percentage of women and migrant workers). The company discloses some sources used to assess human rights risks in its supply chains and is further encouraged to disclose detail on the sources used and stakeholders engaged to assess forced labour risks across its supply chains and disclose the risks identified.

Purchasing Practices: To address forced labour risks in its supply chains, the company is encouraged to adopt purchasing practices that decrease the risk of forced labour, such as improving planning and forecasting and prompt payment, and disclose quantitative data evidencing the implementation of responsible purchasing practices. The company is further encouraged to take steps to ensure that pricing includes the full cost of production, including a living wage/income, and may consider ring-fencing labour costs such that they are not impacted during pricing negotiations. The company should consider integrating [responsible buying practices in its contracts](#) with suppliers, to ensure that the responsibility for respecting human rights is shared.

Enabling Workers' Rights: The company discloses an ethics hotline for reporting grievances. The company is encouraged to ensure its mechanism to report grievances regarding labour conditions in the company's supply chains is communicated to its suppliers' workers and relevant stakeholders (e.g., worker organisations or labour NGOs). Further, the company may consider disclosing data about the practical operation of the mechanism, such as the number

of grievances filed, addressed, and resolved. To support collective worker empowerment, the company is further encouraged to work with local or global trade unions to support freedom of association in its supply chains.

¹ The number of companies assessed in the ranking has decreased from 60 in 2022 to 45 in 2025.

² Research conducted through September 2024 or through December 2024, where companies provided additional disclosure or links. For more information, see the full dataset [here](#). For information on a company's positive and negative human rights impact, see the Business & Human Rights Resource Centre [website](#).
