SUMMARY

Xiaomi Corp. (Xiaomi), the world's second largest smartphone manufacturer,² ranks 42nd out of 45 companies.³ Compared to 2022, the company improved its score by 2 points. This is because the company disclosed its Purchasing Committee is responsible for implementing its supply chain policies addressing forced labour, and because it updated its supplier code of conduct to prohibit worker-paid recruitment fees in its supply chains. KnowTheChain identified one allegation of forced labour in the company's supply chains, related to alleged Uyghur forced labour. However, the company does not disclose the steps it has taken to address the risks of alleged Uyghur forced labour across raw materials and supply chain tiers. The company is encouraged to improve its performance and disclosure on the themes of Traceability & Risk Assessment, Enabling Workers' Rights and Remedy.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Traceability & Risk Assessment: To demonstrate a strong understanding of its supply chains, the company may consider disclosing the names and addresses of its first-tier suppliers, the countries in which its below-first-tier suppliers operate, the countries from which it sources raw materials at high risk of forced labour, and data on the demographics of the supply chain workforce (such as the percentage of women and migrant workers). The company is also encouraged to assess and disclose forced labour risks across different tiers of its supply chains by using a risk assessment methodology which explicitly integrates forced labour and other human rights indicators.

Enabling Workers' Rights: To prevent and address forced labour risks in its supply chains, the company may consider ensuring its whistleblowing hotline is clearly designed as a formal grievance mechanism which is open to its suppliers' workers and relevant stakeholders to report grievances regarding labour conditions. The company may also consider proactively communicating the existence of the grievance mechanism to its suppliers' workers or relevant stakeholders, such as trade unions, worker organisations and labour NGOs, and conducting training to ensure its suppliers' workers know how to use the mechanism. Further, the company is encouraged to take steps to ensure that workers in its supply chains are able to exercise their rights to freedom of association and collective bargaining.

Remedy: The company may consider establishing a process to ensure that remedy is provided to workers in its supply chains in cases of forced labour and disclosing details on this process, such as responsible parties, approval procedures, timeframes, and, crucially, engagement with affected stakeholders. To demonstrate to its stakeholders that it has an effective remedy process in place, the company is encouraged to disclose examples of remedy provided to its suppliers' workers, including with respect to specific allegations in its supply chains.
